CAREER

10.2.2020 - 31.1.2021

META5
https://meta5.io/

REACT DEVELOPER

- Developing reusable user interface components and implementing them following React.js workflow (Redux).
- Translating design from AdobeXD and Zeplin into high-quality code.
- Creating responsive styles compatible with mobile platforms.
- Using code versioning tool - Git.
- Consuming REST APIs.
- Task tracking: Asana
- Experience with Google maps API, Firebase, Reactstrap

I had a little bit of experience with SSR. Setting up a project to be compatible with SSR using Webpack and Babel.

27.2.2019 - 30.6.2019

INTERA Technology Park, Mostar

PARTICIPANT IN PROGRAM "MOJA PRAKSA"

We had the opportunity to participate in training such as teamwork, leadership, communication, presentation.

The main goal of our project was to create the visual identity of CodeHub and to improve marketing strategy.

Our activities were:

- to research the target group
- to create content suggestions in a coworking place
- to work on the implementation of content proposals

1.1.2018 - 30.6.2019

24.4.2019 - 7.7.2019   **BACKEND DEVELOPER**

SPARK School
- SQL database
- Javascript tools and workflow, ES6
- Node.js and web server
- Express.js

SKILLS

SOFT SKILLS (COMMUNICATION, TEAMWORK, SELF-EDUCATION)

Good communication skills gained through my experience as the sales representative and corporate relations coordinator in BEST Mostar. I had a chance to present the product to a potential customer, talk with them about their needs and understand them. In an organization, like BEST Mostar is, we have the opportunity to participate in soft skills training and apply the acquired knowledge.

Since I was the leader of a group of 8 members for over a year, I had the opportunity to improve my leadership skills, and also the opportunity to develop my delegation, goal setting and meeting goals, decision-making skills.

TECHNICAL SKILLS

I have one year of experience with building web applications using React.js. I used Redux for application state management and created both class and function components. For the social login and registration (Facebook, google), notifications and chats I used Firebase.

I am familiar with C#, ASP.NET Core, and MVC architecture. I used ASP.NET Core framework for my school project and MS SQL for the database. For communication with data access layer in the application, I implemented Repository Pattern. Also, I used SignalR for push notifications and added google authentication.

I have experience with Unity creating a little game called EndlessRunner as my school project.

For the last month, I have been building RESTful API with ASP.NET Core which is going to be used in the Desktop application (Windows Forms) and the mobile application (Xamarin).

PROJECTS

- Corporate relations coordinator of the project "Software or Hardware? What about both" 2017, "Enter the world of Data Science" 2018 and "EBEC Challenge 2018" organized by BEST Mostar
- The content writer in the project "Brucoški vodič 2017" organized by BEST Mostar
- Volunteer on FIT Coding Challenge 2018 organized by Faculty of Information Technologies Mostar
- Volunteer on Betapitch 2018 and Find Your SPARK 2018 organized by SPARK
